

Sir's:

I am verry much opposed to the trahos pettion. The 70cm Ham band is very important to us just as every other band we have is. To allow any type of frs style operation there in MY OPPIONION, May well cause interfrance to users (amateur operations)Already on those frequencies. I ask the Commission to deny RM-10521 on the grounds that It DOSE NOT meet with the sprit of what Amateur radio is NOR IS IT COMPATABLE WITH WHAT AMATEUR RADIO DOSE.

If it were GMRS OR EVEN THE EXISTING FRS FREQUENCIES I might see where this could work. But I DO NOT want unlicensed transmitters interfereing with me on my AMATEUR RADIO BANDS> The bear hunters that have been ILLEGALLY USEING two meters have been enough of a problem. Please let us NOT add to that !!

Thank you for your valuable time.

Sincerely
William F. GREEN JR.
